## WEB DEVELOPER / FULL-STACK

### About us

Numera Analytics is an economic consultancy specialized in macro-strategy and sector analysis. Our seasoned team of economists, industry specialists and mathematicians produce rigorous analyses and studies that guide our clients' decisions on investments, commercial strategies and risk management. We serve our clients from offices in Montreal, Buenos Aires, Beijing and Brussels.

The team is supported by information technology specialists managing a sophisticated IT infrastructure.

### Job description

Based in our Montreal office, your main mandate as a web / full-stack developer will be to contribute to the redesign and migration of the company's main web application, from Perl to a modern C#/JavaScript solution, followed by new developments on this application to meet the growing needs of the company.

As a member of the software development team, you will also be called upon to contribute to the development and maintenance of other applications that provide internal services, such as reporting and ETL processes, as well as integration with statistical modeling applications.

### Your main responsibilities will be to:

- Assess and document the existing application;
- Explore and discuss user needs for this application;
- Contribute to the design of the architecture of a new solution;
- Implement, test, maintain and document the new application, including:
  - The new back-end (C#/ASP.NET)
  - Required changes and potential improvements on the front-end (JavaScript)
- Contribute to the development and maintenance of other new or existing C# applications as needed.

**Required profile:**

- Education in computer science, software engineering or other related field;
- Minimum of 3 to 5 years of experience in C# programming for the web, including ASP.NET Core;
- Minimum of 3 to 5 years of experience in JavaScript programming;
- Experience with relational databases (any, but IBM DB2 is an asset);
- Experience with version control (git);
- Knowledge and appreciation of software development best practices;
- Bilingual French / English.

**Our ideal candidate will have:**

- Rigor and method in his/her work;
- A sense of initiative;
- The ability to communicate effectively;
- A willingness to work as part of a team and adjust priorities;
- A desire to contribute to the long-term success of Numera.

**Numera offers a very competitive global compensation package as well as a stimulating and friendly work environment.**
